

ESSENTIAL APPLICATION INTEGRATION SOLUTIONS

Overview

Datagate is a leading systems integrator. Leveraging our world-class experience and the most advanced enterprise tools on the market to design, create, and manage lasting middleware platforms that seamlessly connect our client's entire business. With a unique focus solely on data and application integration we are able to collaborate with clients to create solutions that are tailor-made for our clients, future proof, and cost effective. We have become the worldwide leader in creating solutions to solve complex communication challenges that become critical to our client's ongoing success.

About Us

- Founded in 2008
- Team Size: 10+
- Locations: Chicago (US) & Bremen (Germany)

Specialty Services

- ▶ Talend Integration Services
- ▶ Enterprise Application Integration (EAI)
- ▶ Enterprise Service Bus (ESB)
- ▶ Service-Oriented Architectures
- ▶ Managed Integration
- ▶ 24/7 Surveillance and Monitoring

Common Challenges We Solve

- ▶ Heterogeneous IT Landscapes Needing Complex Connections and Data Enrichment
- ▶ Unnecessary Manual Processes Taking Too Much Time From The IT Staff
- ▶ Frequent Addition of Tools Creating Chaos When Integrating Their Data
- ▶ Lack of Standardized Integration Processes Creating a Spaghetti Environment
- ▶ Customized Integration Desired Between Any Number of Cloud/Legacy/Proprietary Systems
- ▶ Projects Running Behind Schedule and/or Additional Resources Needed for Collaboration

Technologies We Use

Partners

Talend Experience since 2010

Talend Partner since 2012

Most experienced Talend ESB Partner

Past Success

American Homes 4 Rent

Due to rapid growth, AH4R has been adding new tools at an incredible rate. From property management, listing, maintenance, and CRM. We created a completely standardized and scalable process for adding, monitoring, and maintaining connections between hundreds of tools.

Top 5 US Telecom Provider

Was experiencing delays in service outage fixes and needed a way to connect field service techs, to a ticketing system, from a Network Operating Center, that also enriched data from a proprietary tower database. We created a completely customized platform that automatically collected, transformed, and delivered data in real-time, that could be easily maintained internally and expanded upon with any tools in the future.

MRIS-Bright MLS

Merger required systems from multiple corporations to be synced into one common system and seamlessly share data in real-time without interruption. We did this without requiring their staff for development and upon completion of the project handed off without disruption.

Quintiles

Wanted to connect 1800+ medical registries to share, compare, and enrich data across specialty practices. The idea being to help in providers anticipate and prevent avoidable/potential complications and to assist in making critical decisions at the bedside.

ESSENTIAL APPLICATION INTEGRATION SOLUTIONS

Companies We Have Worked For

Technologies We Implement

Talend

- ▶ Talend Data Services Platform
- ▶ Talend Application Integration (ESB)
- ▶ Talend Data Integration (DI)
- ▶ Talend Cloud

Integration

- ▶ Apache Camel
- ▶ Spring Integration

Messaging

- ▶ ActiveMQ
- ▶ RabbitMQ
- ▶ Kafka

Monitoring+Logging

- ▶ Elastic/Kibana
- ▶ Splunk, nagios

Security

- ▶ WS-Security
- ▶ Oauth
- ▶ SAML

Standards

- ▶ SOAP, XML
- ▶ REST, JSON
- ▶ CSV, HL7
- ▶ Odata
- ▶ LDAP
- ▶ SQL

Operations

- ▶ Microservices
- ▶ Kubernetes Docker
